## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 5, 11-23 and 26 are allowed.
2. The following is an examiner's statement of reasons for allowance: The applicant's remarks sent on 4/19/07 in pages 1-6 elaborate the reasons why Yagasaki and Kovalev do not specifically disclose the combination of limitations of claim 11. The prior art does not specifically disclose the combination of limitations of claim 11: a motion vector decoding device for decoding an encoding result which is obtained by encoding motion vectors of respective blocks obtained by partitioning each frame of moving image data, comprising: predicting means for predicting a motion vector of a target block based on motion vectors of a plurality of blocks adjacent to the target block; determining means for determining accuracy of a prediction made by said predicting means based on degrees of non-uniformity of motion vectors of a plurality of blocks adjacent to the target block; and decoding means for decoding the motion vector of the target block by using a result of the prediction made by said predicting means with a decoding method selected from at least two different decoding methods based on a result of a determination made by said determining means, wherein said at least two different decoding methods use different codes, respectively, to decode the same motion vector. Similarly, claims 12, 13 and 20-22 are patentable for similar reasons. The combination of limitations of claim 5 is not disclosed in the prior art. Also, the combination of limitations of claim 26 is not disclosed in the prior art.
